

National Manufacturing Co., Inc. is a leading supplier of deep and shallow draw metal forming services supplying a broad variety of critical service components to medical equipment, military, aerospace and many commercial applications to OEMs and sophisticated customers worldwide. Continued growth has created more opportunities for talented individuals to join our team.

National Manufacturing Co., Inc. is currently seeking a Quality Engineer with the following experience:

Quality Engineer responsible for designing and documenting quality requirements for New Products and continually improving existing requirements. He/She will be a single point contact with customer for providing quality related documentation to customers. The ideal candidate is a details oriented person and has hands on experience with documenting quality requirements such as APQP, PPAP, FMEA, FAI, Gage R&R, Capability Study, Inspection Instructions and Procedures and Balloon Drawings. Must be a power user of MS Office and Outlook and understand GD&T. Experience with Minitab and deep understanding of applied statistics as a problem solving tool is a big plus. He/She will be capable of managing multiple projects concurrently, while documenting and communicating formal project plans. Engineer will be able to test, and install newly developed systems, inspection procedures and train appropriate employees. Also he/she will be able to provide technical support to manufacturing and tool design engineers to help proactively improve process efficiency starting at the beginning of new product development. The engineer should be familiar with lean manufacturing and work cell design and functionality.

Additional Qualifications

- Bachelors degree in engineering (ME or IE or EE or Chem. E or QE)
- Six Sigma Black Belt and/or CQE certification is desirable
- 3 to 7 years of experience in Manufacturing environment, preferably in a metal industry
- Extensive experience dealing directly with customers and do presentations
- Solid experience with creating Quality Documentation
- Ability to work well on a Continuous Improvement team, as well as be self-motivated and independent when necessary
